- ✓ Others

# SOCIAL

## COMMITMENT

## We Foster the Development of the Rural Communities in Northwestern Argentina

Our main commitment consists in aligning economic growth with sustainable development in northwestern Argentina.

We believe quality education is key to achieve sustainable development goals. Bearing this in mind, in 2003 we created Fundación Vicente Lucci to foster the development of the rural communities in the region by performing actions that meet their social and educational needs.

We develop our own programs to strengthen and supplement formal education by means of training projects related to values, health, environmental care, child labour prevention, and social skills for adulthood, and aimed at children, teenagers and young people.

**Our main areas of work are:**

**Education**

**Labour inclusion  
and entrepreneurship**

**Citizen  
engagement**

## Our Annual Outreach

**40 schools**  
(primary and secondary  
levels)

**33 rural communities**  
related to Grupo Lucci's  
companies

**4 provinces**

**3,600 children**  
benefited from the programs

**2,700 young people**  
received our programs
