

About the 2022 Report

The reporting period begins on January 1 and ends on December 31, 2022. This enables us to systematise information and be transparent, including also a comparison with the indicators from previous reports in terms of our ESG (Environmental, Social and Governance) performance, in order to meet all our stakeholders' expectations.

This report has been prepared in a spirit of respect for human, labour, environmental and anticorruption rights and thus in accordance with the 2021 GRI Standards and the SASB Standards for the industries of agricultural products as well as meat, poultry and dairy products. In addition, we present our contribution to the Sustainable Development Goals (SDGs) of the UN 2030 Agenda.
